Presenting...Pearlific® Viburnum

With a current trend of simplicity in the garden, Pearlific® Viburnum fits in beautifully. The magnificent shrub cultivates elegance from the start with plentiful blooms, attractive foliage and a mild fragrance that leaves you wanting more. The compact 5-6' x 5-6' habit creates a perfect focal point in the garden. As the hot days of summer pass on by, Pearlific® extends the growing season with a pop of color as it produces red berries that ripen to black in late fall & winter. The attractive evergreen foliage also maintains its color year round. With its low maintenance and ability to adapt quickly to the landscape, Pearlific® is an ideal addition to any garden.

New varieties, amazing blooms, easy care.

WHAT'S NEW

SO MANY EXCITING ADDITIONS

The Gardener's Confidence® Collection is filled with beautiful ornamental shrubs, vines, and edibles. There are over 50 diverse varieties that are plentiful with blooms, disease resistance, and easy care attributes. They also offer interesting foliage and structure year round in the garden. Try planting multiples in the landscape to create sweeping color, as specimen plants for a striking focal point, or in containers with annuals and perennials to make a spectacular blend.

9

**Bloom 'N Again®
Pink Explosion Azalea**

Stunning, dark pink blooms in spring and fall. Perfect for naturalized areas.

13

**Blue Suede® Southern
Highbush Blueberry**

The perfect addition to your home garden or container with large, nutritious fruit. Self-fertile.

15

**Blue Cascade®
Distylium**

This low spreading evergreen shrub will add year round beauty to your landscape.

17

**Pink Pig®
Mid-Size Crapemyrtle**

These large, soft pale pink flowers will make you squeal with delight.

23

**Baby Lace®
Hydrangea Paniculata**

Petite, lacy white blooms held upright by strong stems. A great cut flower!

DWARF CRAPEMYRTLES

Razzle Dazzle® Series

The Razzle Dazzle® Dwarf Crapemyrtles were carefully selected for their unique attributes, compact size and disease resistance. Look forward to color through the seasons as they explode into bloom in summer and provide a stunning display through fall. Best grown in full sun, they are ideal as accents in the landscape, container features, or for low maintenance mass plantings.

DWARF
Compact Habit

Strawberry Dazzle® Dwarf Crapemyrtle
Featured with Chapel Hill Lantana, Asparagus Fern, Joseph's Coat and Acorus.

Tips:

- 1) Deadheading will encourage reblooming from summer to fall.
- 2) If pruning is needed to maintain shape or size, do so after the plant is in dormancy, usually late winter to early spring.
- 3) Colder than Zone 6? Dwarf crapemyrtles are excellent for container plantings. For more info visit the Care and Planting section of the Plant Profile web page.
- 4) The small leaves, mature trunk, and twisted branches make the dwarf shrubs a beautiful choice for bonsai planting.

Blooms in spring and fall!

REPEAT BLOOMING AZALEAS

The Bloom 'N Again® Series

The Bloom 'N Again® Azaleas have been carefully selected for their repeat blooming habit and cold hardiness. The broad range of brilliant colors, flower shapes and forms make them desirable for any garden. Azaleas are evergreen shrubs making them ideal for planting in mass or integrating into a hedge or shrub border. With little need to prune, they are perfect for naturalized areas such as woodland gardens.

Avg 3-5' x 3-5'

6B-9 or 7-9

Spring & Fall

Part Sun

- Broad range of brilliant colors
- Unique flower shapes and forms
- Consistent repeat blooming habit
- Best grown in sun to partial shade
- Pest & disease resistant
- Compact size, average 3-5' h x 3-5' w

Tips:

- 1) When planting, place in hole so that the top of root ball is slightly above ground level.
- 2) Most varieties start their fall blooming season in late September.
- 3) If pruning is required, do so after flowering to maintain a desired size.

PROLIFIC
Bloomer

Cultivate beauty in your garden!

VIBURNUM

Viburnums blends beautifully into the garden offering masses of blooms and attractive foliage. With their ability to adapt quickly to the landscape, they make an ideal choice for gardeners looking for a showy plant with low maintenance. Pearlific® Viburnum produces an abundance of blooms with a mild fragrance to perfume the garden space. It extends the growing season with a burst of color as it produces red fruit that ripens to black in late fall and winter. Snowball Viburnum creates a stunning display of white, snowball-like blooms with heavy flowering in the summer months. It is wonderful for cut flowers to cheer up the home.

Pearlific® Viburnum

PP#23,385

- Pink-tinged buds open to white flowers with mild fragrance
- Evergreen with dark glossy foliage
- Red fruit ripens to black in late fall & winter

Tips:

- 1) Limit pruning to the removal of any damaged branches after flowering.
- 2) Plant Snowball Viburnum at the back of a border to fill a large space.
- 3) Mix with a variety of annuals & perennials such as verbena, miscanthus and daylilies for added texture and color.

Snowball Viburnum

- Masses of pure white, snowball-like blooms
- Purplish-red fall foliage
- Perfect choice for elegant cut flowers

Plant profiles & more.

SUMMER
BERRIES

Delicious
& Home Grown

Large nutritious berries!

EDIBLES

Create an edible landscape with Blue Suede® Blueberry. The self-pollinating variety is easy to use in home gardens or mixed containers. Beautiful white flowers tinged with pink bloom in spring. Luscious large fruit ripen in early summer providing a host of great nutritional benefits (high in Vitamin C and antioxidants). Burgundy fall foliage extends the beauty into the winter season.

x 3-5'

Zone
6-9

Spring

Full Sun

Blue Suede® Southern Highbush Blueberry

PP#21,222

- Large, nutritional fruit
- Early ripening (self-pollinating)
- Beautiful fall foliage
- Perfect for small gardens

Tips:

- 1) Combine with other acid-loving shrubs such as azaleas, camellias and hollies for an easy care edible landscape.
- 2) With its self-fertile attribute, Blue Suede® works well in containers on the patio or deck.
- 3) If pruning is needed, it should be done after fruiting. Remove old stems and weak branches to encourage heavy fruiting.

Separate your
landscape from the
cookie cutter look!

PERFECT
for Smaller Gardens

Add cheer to the garden!

MID-SIZE CRAPEMYRTLE SERIES

Imagine a garden with puffs of bright colored blooms adding cheer during the hot summer months into fall. While some plants struggle to thrive in high temperatures, the new barnyard Mid-Size Crapemyrtles will be ready to shine with playful shades of red, purple and pink. Averaging in size from 6'-10' high, their modest size makes them perfect for smaller, full sun gardens. These low maintenance, drought tolerant shrubs add character minus the tedious work that comes along with many plant varieties.

Zone
6-9

Summer

Full Sun

Red Rooster®

PP#23.178

- Abundant, brilliant red flowers
- Excellent fall color
- Disease resistant foliage

8'-10'h x 5'w

Pink Pig®

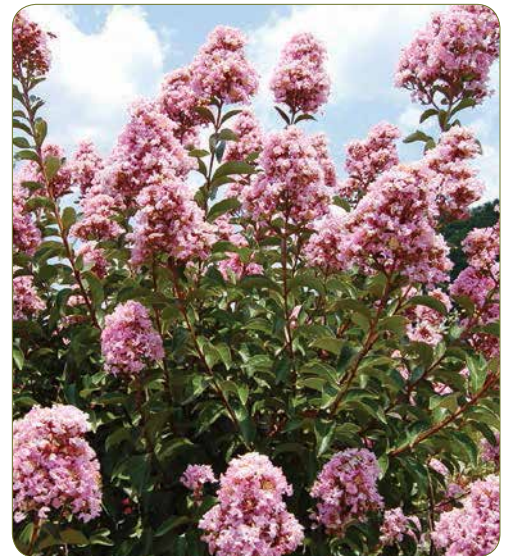

PP#23.499

early bloomer

- Large, soft pale pink flowers
- Earlier to bloom than other varieties
- Beautiful burgundy buds

8'-10'h x 5'w

Pink Pig®

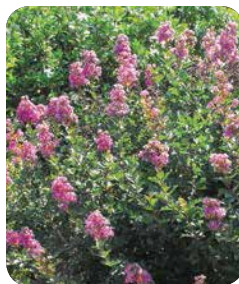

Purple Cow™

PP#23.560

- Majestic deep purple flowers
- Beautiful reddish stems on new growth
- Disease resistant foliage

6'-10'h x 5'w

Tips:

- 1) Plant in full sun for best bloom performance and foliage color.
- 2) Easy to maintain for a stress-free garden.
- 3) If pruning to maintain shape or size, prune after the plant is in dormancy, usually late winter to early spring.

Plant profiles & more.

FRAGRANT
Repeat Blooms

Beautiful forms. Amazing Fragrance. Repeat Blooms.

GARDENIAS

In late spring, the Heaven Scent® and Pinwheel® Gardenias create a flurry of white flowers that repeat bloom throughout the summer months. The cold hardy varieties feature tight compact forms perfect for smaller gardens and mixed containers. With their intensely fragrant blooms, they are great choices to use as cut flowers for home decorating or entertaining.

Heaven Scent®
One of our favorites! Repeat flowering!

Spring to Summer

PROFUSE
Blooms

Fringe benefits!

LOROPETALUM

The Glowing Horizons® Series

The outstanding varieties of loropetalum in the Glowing Horizons® series feature more dense growth habits along with excellent disease and insect resistance. Easy to grow and sun loving, the beautiful evergreen foliage and prolific, tassel-like blooms make them perfect choices for the garden.

Best grown in full sun, these varieties can also be used in partial shade areas.

EverRed®
Our of our
favorites!

Carolina Moonlight® Loropetalum

PP#23,385

- Plentiful, creamy white blooms
- Beautiful olive green foliage
- Excellent disease & insect resistance
- Compact habit

Ever Red® Loropetalum

PP#22,510

- Reddest blooms ever seen on a loropetalum
- Beautiful dark burgundy foliage
- Retains foliage color through hot summer months

Tips:

- 1) Due to their natural forms, pruning is not required. If a certain shape or size is desired, prune after spring flowering.
- 2) Looking for a different way to bring attention to the garden? Loropetalum are perfect for training into a tree form.
- 3) Create a beautiful fall planter by mixing Ever Red® with autumn colors that compliment the dark tones.

Sun loving

Lacy, Petite and Compact!

SUN LOVING HYDRANGEAS

Baby Lace® Hydrangea

Baby Lace® is a dwarf paniculata hydrangea that is covered in petite, lacy white blooms against dark green foliage. Its smaller size of 4' by 4' makes it perfect for container plantings and small gardens. The delicate looking blooms are held upright by strong stems that don't flop. Thriving in full sun to partial shade, Baby Lace® makes a wonderful cut flower and dries beautifully for long lasting arrangements.

3-4'
x 3-4'

Zone
4-8

Summer

Full Sun to
Part Shade

Baby Lace® Hydrangea

PP#23,387

- Petite, lacy white blooms in summer
- Dwarf, compact habit perfect for containers
- Wonderful cut flower

Tips:

- 1) With its slow growth rate and natural form, pruning is not required.
- 2) If pruning is needed to maintain shape or size, prune after the plant is in dormancy, usually late winter to early spring.

Plant profiles & more.

A remarkable rebloomer and a living legacy of Penny McHenry.

REPEAT BLOOMING HYDRANGEAS

Mini Penny™ Hydrangea

Mini Penny™ Hydrangea excels above all rebloomers for form and blooming abilities. It has a tight compact habit with dependable blooms from summer into fall. Named in honor of Penny McHenry, founder of the American Hydrangea Society, it was developed by close friend and distinguished breeder, Dr. Michael A. Dirr. Mini Penny™ serves as a living legacy to the passion Penny had for all hydrangeas.

Mini Penny™ Repeat flowering!

Add height to the garden!

FLOWERING VINES

Create a pop of color to the garden space with outstanding selections of flowering vines. Grown on a trellis or fencing, vines help to add vertical height and a beautiful backdrop to other plant varieties.

Choose selections such as Hot Lips® Campsis that feature an abundance of colorful blooms and superior climbing abilities for easy care and low maintenance. Other varieties such as Madison Jasmine and Lady Banks Rose add fragrance to the outdoor space and help to attract birds & butterflies.

Hot Lips®
Trumpet Vine

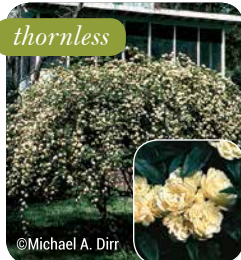

Amethyst Falls Wisteria

- Attract butterflies; blooms in late spring
- North American native selection
- Perfect on arbors and trellises

Madison Jasmine

- Fragrant white blooms in late spring
- Evergreen foliage year round
- Excellent groundcover if allowed to spread

thornless

Lady Banks Rose

- Fragrant white blooms in late spring
- Evergreen foliage year round
- Excellent groundcover if allowed to spread

reblooming

Hot Lips® Trumpet Vine

PP#19,415

- Large, red hot trumpet blooms; repeat flowering
- Abundant flowers late spring through summer
- Native hybrid; superior climbing abilities

Jasmine Duet®

- Profuse yellow blooms in spring and fall
- Great selection for adding vertical height on trellis or fence
- Evergreen foliage year round

Tips:

- 1) Keep the distance - train vines up trellises about a foot away from the house.
- 2) Follow a routine watering schedule to help establish strong roots during the first growing season.
- 3) Use ornamental vines as the focal point in a container with other smaller plants.

HEAT
Tolerant

Add texture to the garden.

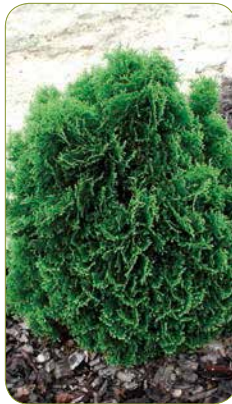

CONIFERS

Providing a broad range of sizes, forms and textures to choose from, conifers create a perfect framework that unifies gardens throughout the seasons. With year round evergreen foliage, they can be used as a backdrop for annuals, perennials and flowering shrubs to create a colorful backyard haven. Choose larger upright conifers such as Chaparral Cypress as a focal point to draw the eye to a certain area. For smaller gardens, dwarf varieties such as Hot Head™ Arborvitae can be used to provide unparalleled texture without taking up too much space. With the added benefit of extreme heat and cold tolerance, they are excellent low-maintenance plants.

Hot Head™ Arborvitae

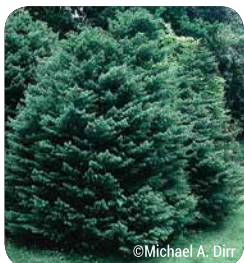

- Vibrant evergreen foliage
- Dwarf mounded habit
- Extreme heat & cold tolerance

Chaparral Cypress

PP#23,178

- Unique sea-foam green foliage
- Upright, conical habit
- Disease resistant

Black Dragon Cryptomeria

- Soft, dark-green needles
- Beautiful compact tree
- Ideal focal point in the landscape

©Michael A. Dirr

Paul's Mop Cypress

Where to Buy

GENERAL GUIDELINES AND INFORMATION

Planting Instructions

- See our variety specific picture tags or the Gardener's Confidence® Collection website for instructions on each plant.

Container Gardening for Northern Climates

- If colder than Zone 6, try container planting with hydrangeas, gardenias and dwarf crapemyrtles. Simply bring the container into the garage or basement during the cold months allowing the plant to go dormant during the winter. Keep moderately moist but well drained during this period (just enough to keep the roots semi-moist). Place the container outside again when temperatures rise above freezing and your plant will be ready for new spring growth.

USDA Zones

- As a valuable tool for all gardeners across the country, the USDA Plant Hardiness Zone has specific geographic zones based on average annual temperature. This map divides North America into 11 separate zones; each zone is 10° F warmer (or colder) in an average winter than the adjacent zone. An interactive map of the USDA Zone map may be accessed on-line on the Gardener's Confidence® Collection website.

Partnering with MONROVIA®

In 2014, the Gardener's Confidence® Collection will be partnering with the MONROVIA® brand at certain participating garden center locations. The Gardener's Confidence® Collection logo will be found on the front cover of the tag, and all the plants will still be identified by their Registered or Trademarked names. When looking for the Gardener's Confidence® Collection plants at your local garden center, be sure to ask for them by name or by the name of the collection.
