# Mini Penny™ Hydrangea

## *A Living Legacy of Penny McHenry*

Penny McHenry, founder of the American Hydrangea Society ([www.americanhydrangeasociety.org](http://www.americanhydrangeasociety.org)) was a tremendous voice and source of inspiration for hydrangea lovers and gardeners throughout her life. Known by friends as the “Hydrangea Queen,” she eagerly shared her insights and gardening tips with the many visitors who traveled to her spectacular garden, coined “Hydrangea Heaven.” The Mini Penny™ Hydrangea was developed by Penny’s close friend and distinguished breeder, Dr. Michael A. Dirr, who named it in her honor. This new variety will serve as a living legacy to the passion Penny McHenry had for all hydrangeas.

Mini Penny™ Hydrangea

*Hydrangea macrophylla 'Mini Penny' PP#15,744*

*Developed by Dr. Michael A. Dirr*

The Mini Penny™ Hydrangea is an outstanding remontant mophead, with bountiful blooms of blue or pink, depending on soil pH. While it performs best in Zones 5-9, the Mini Penny™ has also tested well in Zone 4 (temperatures as low as -30° to -25° F). It features a compact, mounded habit of 3 to 4 feet, with blooms spring through fall (remove spent mopheads to encourage reblooming).
